

## Certified Information Systems Security Professional (CISSP) Training Jakarta , 05<sup>th</sup> - 09<sup>th</sup> of July 2010 (5 days)

*"After following the SecurityFirst CISSP Training, I had had more confidence to take CISSP Exam. The trainer has solid information security experience and have in-depth knowledge of the materials."*

### Why Pursue The SecurityFirst CISSP Training?

CISSP, governed by the International Information Systems Security Certifications Consortium (ISC)<sup>2</sup>, is very well respected vendor neutral certification which is universally recognized as key component in the selection process for management-level information security positions. The certification was designed to mastery of an international standard for information security. Achieving the CISSP proves high proficiency in foundation security disciplines.

The CISSP Training held by SecurityFirst, a XecureIT Division of Education and Community Development, is the most comprehensive review seminars in Indonesia discussing information systems security industry best practices. It serves as a strong learning tool for mastering concepts and topics related to all aspects of information systems security by reviewing the 10 security domains of the CISSP Common Body of Knowledge (CBK).

The goal of the five days training is to provide information security professionals a fully-immersed all-inclusive CISSP training and certification experience. By attending this course, students prepare for the exam while at the same time obtaining the essential security knowledge that can be immediately used to competently handle security threats and to improve organizational security properly.

### Location

SecurityFirst Training Room or Hotel Meeting Room, Jakarta (Depends on the participants number)
